re: "Inside the FBI" by Andrew Tully.
NOTICE of Libel action.

Dear Sir:

In respect to the above entitled book, which apparently has been reprinted by Dell publishers(I987), I have recently read the section in the book dealing with the Rev. Martin Luther King jr. homicide. The content of this section is not surprising since Tully in his forward comments:

> The Author is indepted to FBI Director William H. Webster for his sympathetic encouragment..."

In respect to said content, Tully has me falsely(I92), falling out of a speeding car after robbing a grocery; then at (I98), he has me as a suspect in the murder of three (3) blacks during a prison riot in the Missouri penotentiary in I966. Then of course Pimp Tully quoates various convict informants(obviously from FBI files), about statements attributed to me.

While I have no interest in refuting all of this government pimp's accusations, in fact I was never a "suspect" in any type violence during the 6 years I was a prisoner in the Missouri prison, and this is known by Tully's source, Faggothead Webster & his FBI PR operator Further, if Tully could have gotten his nose out of the seat of Webster's britches for a few minutes and did a little investigating he would have found that all records in the MLK case that does not support the goverment case have been classified. In addition, when Pimp Tully was reporting on my brother, John Ray, he could have alluded to how Webster, as a federal Judge in St. Louis, fixed a trial wherein John was charged with aiding & abetting a bank robbery The fix resulted in John receiving I8 years from Webster while the actual robber received I0 years. Then, as a result of the fix, the I0 years was reversed by Webster's cronies on the US 8th circuit court of appeals.

Sincerely:

J. Ray
